KNIT-INS + STRIPES

1. COLOR BLOCKS + POMS

Consider a multicolored pom or a marled yarn pom for added variety.

Color blocking is a fun way to customize your cuffed beanies. Artex offers more than 120 different yarn colors – you're bound to find the perfect color combination.

Here are other examples of color block hats and poms.
The colors of these styles are shown for example.
Customers can choose out of over 120 colors to get the desired look.

2. LOOP LABELS

Loop labels work well on all our beanie styles and are a simple and effective way to customize hats.

3. PATCHES

Patches can be customized according to desired size and patch material.

Example of a two-sided sewn patch

Example of a four-sided sewn patch

4. EMBROIDERY

Custom embroidery can range from simple lines and text, to a multicolored image.

For non-cuff beanies (like the Electricians Local and SavATree beanies shown), embroidery is "hidden." This means there is no visible backing when you turn the hat inside out.

Hat shown inside out

5. KNIT-IN DESIGNS + STRIPES

FLAT KNIT

FLAT KNIT

Beanies and scarves are made on the circular knit-in machine. These knits have a lighter/thinner material and due to the circular knitting, there is a small mark on the side of beanie showing the changeover between stripes. This can be more noticeable with multiple stripes. **The length of circular jacquards can be customized but the width/circumference is set at approx. 9" wide.**

Beanies, headbands and facemasks are made on the flat knit machine. These knits are a little thicker/heavier than the circular knit beanies. Since there is a vertical seam on these, any stripes can be made to match up without any changeover mark. **The length and width can be customized on flat jacquards, so these are a good option for different sized beanies.**
